WASHINGTON STATE
Society of Pathologists

Challenging Cases in Gynecological Pathology
&
COVID-19 Autopsy Findings

May 29, 2020
Remote access through zoom

WSSP is proud to continue to offer high quality CME for its members and members of surrounding state societies and beyond in this unprecedented time of work disruption, social distancing and travel restrictions.

Our on-line, interactive case-based CME/SAM offering consists of digital microscopic sessions that are driven by practical application and highlight important concepts that are key to understanding disease processes and making an accurate diagnosis.

This quarter’s session will focus on challenging cases in gynecologic pathology and will also feature autopsy findings in COVID-19 patients from the University of Washington.

Virtual Microscopic (WSI) Slides for gynecological cases will be available for attendees in advance of the meeting so that you can view them and formulate your own opinion and differential.

Your participation also helps support the Washington State Society of Pathologists in all of its educational and advocacy efforts. This is a great opportunity to learn, obtain CME and SAM credits, converse with your fellow colleagues, and support your organization.

PROGRAM SCHEDULE
Friday, May 29, 2020
Join us for 3 hours of category I CME and 3 SAM credits.

4:15 PM – 4:30 PM .............................................. Opening remarks, introduction of speakers
